Вывод

В ходе данной практической работы было проведено полное функциональное тестирование REST API сервиса по поиску работы средствами Postman. Все 36 тестовых сценариев завершились успешно. Проверены: корректность ответов всех эндпоинтов, работа JWT-аутентификации, разграничение доступа по ролям (RBAC), защита от дублирования откликов на уровне базы данных, а также корректная работа вложенных объектов в резюме (навыки, образование, опыт).
